Skills

Languages: TypeScript, JavaScript, Java, HTML5, CSS

Frameworks: React Native, Svelte, React, Next, Sveltekit, d3, Redux, Tailwindcss, firebase, AWS

Tools: Figma, Git, SSH, Linux, VS Code, Github Copilot

Projects

Abracadabra: shop and scroll mobile app · [github](#)

- Applied UX knowledge to create a high fidelity mockup in **Figma**
- Lead the frontend team to develop a **React Native** app that puts the tiktok into shopping
- Collaborated with the backend team to create the classes needed to create a responsive UX

Happy Garden: a gratitude journal, but gamified · [project page](#) · [github](#)

- Won 3rd place at Girl Develop It 2022's health hackathon
- Lead a team of mostly new developers to create a fully functioning **React.js** app in under 3 days
- Singlehandedly designed the entire system and delegated tasks based on abilities

Bunny Money: A free financial literacy tool for kids · [project page](#) · [github](#)

- Deployed a progressive **Svelte.js** web app in **TypeScript**, installable as a mobile app
- Designed a kid-friendly UI with **Tailwindcss** that parents and kids can use to track kid's allowance
- Incorporated **Firebase** as the backend for authentication and data storage

Experience

New Leaf English

Jinju, South Korea

Full-stack developer / English

December 2020 – October 2021

Teacher

- Developed a secure authentication system in node.js using passport.js and express.js
